SUMMARY

+3 years experienced in IT, inquisitive and driven software developer with acquired skills in web development mainly focuses on front-end. Skilled at experience in writing clean codes, developing complex solutions, creating responsive web designs. Being able to create effective algorithms boosts my coding skills to develop a flexible and well-structured front-end architecture, along with the APIs to support it. Possessing strong creative thinking skills, high energy and integrity. Ability to interact positively and communicate appropriately with team members. Quickly grasp new technologies and concepts to develop innovative and creative solutions to problems. Always eager to learn various technologies, tools and libraries. Especially interested in the **Front end/Web Development, HTML, CSS, JS, React**. Excited to learn new things and improve, lifetime student. In addition, proficient with building dynamic and browser compatible single page applications (SPA) and object-oriented programming: developing, testing, and debugging code. Eager to tackle complex problems and find ways to maximize user efficiency.

WORK EXPERIENCE

Upwork

Frontend Developer (Freelance)

April 2022 -

Present

- Worked in an agile team of 7 members and provided end-to-end solutions for clients with HTML5, CSS3, JavaScript ES6 and React.
- Developed interactive, responsive and scalable frontend applications using HTML5, CSS3, JavaScript ES6, React, Git&Github,
- Experienced in writing modular and reusable codes, using build tools and package managers,
- Designed responsive applications to different screen resolutions using Bootstrap and media queries.
- Worked with React-router utilizing Private and Public Router, bootstrap and axios libraries for user-friendly preparation of prepared websites,
- Transition of data from page to page implemented by Context API,
- CRUD operations/functions developed to handle HTTP requests; fetch API and axios and responses to communicate DB,
- Authentication handled using Firebase.js and helper functions,
- Experienced applying React functional and class components,
- Applied Continuous Integration (CI) with Github-Firebase,
- Studied on Computational Thinking, Operating Systems, Version Control Systems(Git & Github),

Software Development Life Cycle (SDLC),

- Used SCRUM & Agile methodologies and JIRA while working on individual & group projects.

Adiguzel Avukatlik Burosu

Sep 2019 - Nov 2021

- Worked within the differentiation of cultural levels in education.
- Found creative solutions to the problems encountered.
- Strong communication was established with customers in the projects carried out.
- The workflows of the projects were planned result-oriented.

TECHNICAL SKILLS

HTML5 | CSS3 | JavaScript | React.js | Redux | SASS | Bootstrap | Material.UI | Axios | Yup | Python | Linux | SQL | Git | GitHub | APIs | Agile | Jira | SDLC | OOP | RESTful APIs.

SOFT SKILLS

Analytical Thinking | Problem-Solving Abilities | Self-Motivated | Strong Communication | Project Management | Planning | Time Management | Adaptability | Continuous Learning | Collaboration & Teamwork | Coaching Mindset | Resilience | Curiosity | Emotional Intelligence | Creativity.

PROJECTS

- **Fireblog App** : In this project, it is aimed to create blog posts using firebase realtime-database and display them on the dashboard. Adding, deleting and updating blog posts can be done. In the project, firebase realtime-database library was used for storing data, material-ui library for styling, react-router library for page transitions and react-toastify library for notifications. In addition, firebase was used for login and authorization processes. Skills/Tools : Firebase realtime-database library, Material-ui library, React-router library, React-toastify library, Firebase.
- **Movie-App**: My purpose is to create movie store database. React-router library had been used in this project for navigating to different pages in the app. I used Google Firebase as the authentication server. I practiced my knowledge regarding using React custom hooks and protected routes in this project. For Styling I adopted Bootstrap. Importantly, I also added authorization option with Google accounts as well. Skills/Tools : React, Bootstrap, Firebase.
- **Meal-recipe-App** : In this project, meal-recipe-app was designed using React and its router library. I fetched data from private API. I created a login page for authentication. The user first need to register to display

content inside of the app. For Styling I adopted Material UI. I created custom react hook by using useContext.
Skills/Tools : React, Material UI, React Router.

- **Weather Condition App** : The purpose of this project is to make a weather application using the <https://api.openweathermap.org> API. It brings and displays the weather conditions of the location desired by the user. Skills/Tools : Styled Components, Fetch API.

EDUCATION

Hacettepe University

Sep 2015 – Sep 2019

Bachelor Degree (Law)

CERTIFICATIONS

- Clarusway JavaScript Developer Course Certificate Jul 2022
- Clarusway HTML & CSS Course Certificate Jun 2022
- Clarusway React Developer Course Certificate Aug 2022
- Clarusway Frontend Developer Certificate Aug 2022
- Clarusway IT Fundamentals Certificate Nov 2022

LANGUAGES

- Turkish : Native
- English : Intermediate
